

Amendments To The Claims

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

1. (Currently Amended) A multi-function golf training device, comprising:

a base member;

at least three ~~of elevating assemblers nonlinearity~~
assemblies nonlinearly provided on said base member, ~~and each~~
~~elevating assembler has~~ assembly having a elevating part that
can be forced up or down by external power;

a unitary putting green board ~~pivots~~connected so as
to pivot on ~~thesethe~~ elevating parts of ~~thesethe~~ elevating
assemblies ~~and the~~ such that a sloping degree and direction
~~can adjust~~of the board is adjustable by ~~movemoving~~ ~~thesethe~~
elevating parts up or down., ~~Saidsaid~~ putting green board
~~includes~~ comprising a ball cavity for the golf ball; and

said base member ~~has a~~ having an outer wall around
three sides, ~~and a~~ vent at one side, ~~and a~~ ball trench ~~arrays~~
arranged beside the wall, ~~and said base member also has and a~~
recess in the center area ~~and which~~ connects with the ball
trench by a guide way, and

wherein the at least three elevating assemblies are connected between the base member and the putting green board and each elevating assembly is operable independently of the other elevating assemblies.

2. (Currently Amended) The golf training device as defined in claim 1, wherein ~~those~~ the elevating ~~assemblies~~ including a assemblies include an artificial elevating assembler assembly and two automatically elevating ~~assemblies~~ assemblies.

3. (Currently Amended) The golf training device as defined in claim 2, wherein ~~those~~ the two automatically elevating ~~assemblies~~ assemblies are provided near to the vent.

4. (Currently Amended) The golf training device as defined in claim 2, wherein said artificial elevating ~~assembler comprising~~ assembly comprises a shell provided on the base member and a elevating part slideable and positionable ~~pivots~~ so as to rotate in the shell.

5. (Currently Amended) The golf training device as defined in claim 4, wherein one of the shell or the elevating part has a chase and the other has at least one flexible arm and receives that is received in the chase.

6. (Currently Amended) The golf training device as defined in claim 4, wherein one of the shell or the elevating part has a limitative part and the other has a tappet for engagement with the limitative part to make an uppermost stop position and a ~~nethermost~~ lowermost stop position.

7. (Currently Amended) The golf training device as defined in claim 6, wherein said limitative part is a long hole and said tappet ~~receives~~ is received in said long hole.

8. (Currently Amended) The golf training device as defined in claim 2, wherein ~~the each~~ each automatically elevating ~~assembler comprising~~ assembly comprises a shell, ~~and a an~~ elevating part that is provided on the shell, and a motor that can force the elevating part move up or down by a gear set.

9. (Currently Amended) The golf training device as defined in claim 8, wherein said gear set ~~comprising~~ comprises a pivot that ~~pivots~~ rotates in the shell and connects with said elevating part ~~and said elevating part~~.

10. (Original) The golf training device as defined in claim 8, wherein the gear set comprising an endless screw and a worm wheel.

11. (Currently Amended) The golf training device as defined in claim 8, wherein said shell ~~comprising~~ comprises two ~~microswitch~~ microswitches, and when the elevating part moves to the uppermost stop position or ~~nethermost~~ lowermost stop position, an appropriate one of the microswitch microswitches will send a signal to stop the motor.

12. (Currently Amended) The golf training device as defined in claim 8, wherein said shell ~~comprising~~ comprises a counting device for direct or indirect counting or the number of ~~rotation time~~ rotations of the motor.

13. (Currently Amended) The golf training device as defined in either claim 2 or in claim 8, ~~wherein further~~ comprises comprising a controlling device to control ~~these the~~ automatically elevating ~~assemblers~~ assemblies.

14. (Currently Amended) The golf training device as defined in claim 1, ~~comprises comprising~~ comprises comprising three artificial elevating ~~assemblers~~ assemblies therein.

15. (Currently Amended) The golf training device as defined in claim 13, wherein said base member comprises a microswitch that ~~sets~~ sits in the guide way.
